

The Numbers Geme

1. Set up your space:

Scatter the numbers posters across the games hall, playground or classroom.

2. Explain the game to your learners:

The teacher will shout out a sum – an addition, subtraction, multiplication or division in Scots, e.g. ‘Twa add fower!’ and the learners should run to the answer – in our example that would be ‘sax’.

3. The last learner to reach the answer should shout out a new sum, eg. ‘Echt divided by fower’ - and the game continues until everyone is tired out!
